LEARNING & DEVELOPMENT | LEARNING STRATEGY | AI-ENABLED LEARNING

Justin Schmeltz

San Jose, CA | schmeltz.justin@gmail.com | (502) 500-9657 | linkedin.com/in/justin-schmeltz

Learning and development professional with nearly a decade of experience identifying performance gaps, gathering complex information from stakeholders, and turning it into structured learning systems, resources, and actionable guidance. Experienced in designing scalable learning supports, synthesizing qualitative and performance data, and using generative AI to improve workflows and knowledge access.

EDUCATION

M.Ed., Special Education
Pacific Oaks College · 2020

B.S., Elementary Education
Indiana University · 2017

PROFESSIONAL DEVELOPMENT

Instruction Design Certificate — In Progress
University of Illinois · Expected April 2027

AI Literacy and Ethics
Foothill Community College · 2026

SKILLS

- Generative AI & AI-Enabled Learning
- Learning Needs Analysis
- Learning Strategy & Program Design
- Stakeholder & SME Partnership
- Instructional Design
- Knowledge Management & Documentation
- Learning Measurement & Evaluation
- Facilitation & Training
- Data-Informed Instruction
- Cross-Functional Program Management
- Accessibility & Inclusive Learning

EXPERIENCE

4th Grade Teacher

San Jose Unified School District · San Jose, CA August 2026 – Present

- Design and facilitate structured learning experiences for 27 learners with varied skill levels, using performance data and observation to identify barriers and adjust instruction, resources, and supports.
- Translate complex curriculum requirements and learner needs into clear, accessible resources, workflows, and guidance that support consistent implementation and independent performance.
- Use generative AI and learning technology to streamline planning, develop instructional resources, and explore more efficient approaches to content creation and learner support.

Special Education Teacher — Resource Specialist

San Jose Unified School District · San Jose, CA August 2025 – May 2026

- Synthesized assessment data, stakeholder input, observations, and performance trends into structured learning plans and actionable documentation used by multidisciplinary teams to guide intervention and decision-making.
- Identified recurring performance barriers, developed targeted interventions and resources, monitored outcomes, and refined supports based on learner data and stakeholder feedback.
- Partnered with educators, specialists, administrators, and families to gather expertise, align priorities, document decisions, and translate complex learner needs into clear, actionable supports.

Special Education Teacher — Autism Resource Specialist

San Jose Unified School District · San Jose, CA December 2020 – May 2025

- Designed and delivered individualized and small-group learning programs addressing complex performance, accessibility, and skill-development needs.
- Developed reusable instructional resources, procedures, and learning supports that translated curriculum requirements and learner performance needs into clear, practical guidance.
